

Amnesia

You were then told that you would not be able to remember anything you did during the session until you were told 'now you can remember anything'.

How hard was it to remember events before you were told 'now you can remember everything', where 0 means you could remember events as easily as normal and 5 means you found it so difficult to remember it was as if there was an actual blank in your memory? *

Normal memory

0

1

2

3

4

5

No memory
